

Marketing Washington Asparagus and Sweet Corn

1994 Crop

**Federal-State
Market News Service**

Washington State Department of Agriculture

United States Department of Agriculture
Agricultural Marketing Service
Fruit and Vegetable Division
Market News Branch

FOREWORD

The U. S. Department of Agriculture, Agricultural Marketing Service in cooperation with the Washington State Department of Agriculture issued daily market reports on Asparagus from April 18th through June 2, 1994 and on Sweet Corn from July 11th through August 10, 1994.

We wish to express our appreciation to the growers, shippers, buyers, processors, railroad officials, the Federal-State Inspection Service, the U.S.D.A. National Agricultural Statistics Service and the U. S. Weather Bureau for their cooperation in providing the information carried on the daily reports and in this summary.

Additional copies may be obtained by sending a check for \$20.00 for each summary made out to the U. S. Department of Agriculture. Mail requests to the Federal-State Market News Service; 2015 South First Street, Room 4; Yakima, WA. 98903. Phone orders are also accepted: (509) 575-2494.

Jeffrey Main, Local Representative
Linda Verstrate, Market Reporter
Pat Ross, Clerk-Typist

MARKETING WASHINGTON ASPARAGUS 1994 CROP

WEATHER, GROWING & HARVESTING: Growers prepared beds in late March and early April in anticipation of the season's start. By mid-April growers were actively harvesting. Although the spring was mild, temperatures were not excessively high. Combined with some precipitation as well as reductions in acreage, supplies were somewhat limited. Harvest continued to be fairly steady, if a little light throughout May and into early June. By mid-June Benton County growers were nearly finished, and by the week ending June 26th, the harvest was nearly complete in all districts.

PRODUCTION: Based on figures from the National Agricultural Statistical Service, growers in Washington harvested 24,000 acres of asparagus in 1994. The harvested acreage was down from 25,500 acres in 1993 and nearly 125 off the 3-year average of 27,333 acres. Yields in Washington averaged 37 cwt per acre, compared previous 3 year average of 34.3 cwt/acre.

Production for the fresh market totaled 248,000 cwt in 1994, compared to 253,000 cwt in 1993, and 310,000 cwt in 1992. Washington's fresh market asparagus averaged \$98.00/cwt, compared to the 3-year average of \$92.90.

The total processed was 32,000 tons, the same as 1993 and down slightly from the 34,000 tons in 1992. Prices averaged \$1,000.00 per ton, up from \$937.00 in 1993, and the 3-year average of \$918.67.

MARKETING: 30 lb pyramid crates, 85% or more green, 8-9 inch cut, Washington Extra Fancy. All prices are for Standard size unless otherwise stated.

The first f.o.b. was issued on April 18th at \$27.00-28.00. Production started slowly and the price rose slightly \$28.00-29.00. By May 2nd prices had reached as high as \$32.00. Although prices slipped the end of that week to \$30.00, the market continued strong and prices remained at \$30.00 until June. On June 8th the price began to rise again as supplies began to thin. By June 13th the price hit \$34.00. The following week prices hit the reported season high of \$37.00-38.00. The last report was issued on June 22nd as supplies were in few hands, although light shipments continued into July.

Washington Consumer Pack, random length, 1/4" minimum diameter, and 1 1/2" maximum white. All prices for 20 pound bunched unless otherwise stated.

The first f.o.b. for asparagus was issued on April 18th at \$16.00. As supplies were generally limited throughout the season, the price for Consumer packs remained fairly good and prices stable. As supplies began thin in early June the price rose slightly to \$16.00-17.00. The last f.o.b. was issued June 10th.

SHIPMENTS: WA growers shipped 176,500 cwt in 1994. Peak shipments went out the week ending April 23rd when 23,800 cwt were shipped, only slightly more than the 27,000 cwt shipped the following week. Shipments went up slightly the first week in June with 16,400 cwt going out the week ending June 4th and 15,900 cwt going out the week ending June 11th.

MARKETING WASHINGTON CORN 1994 CROP

GENERAL COMMENTS

WEATHER, GROWING & HARVESTING: Early spring weather had growers in some of the early Yakima area ready to plant by the end of March. By mid-April most districts were planting. By mid-May some of the earlier Yakima areas had nearly completed their planting as growers continued in Franklin and Grant Counties. With spring weather starting a little earlier than normal, growers were harvesting for the fresh market after July 4th. By the week ending the 17th Franklin County growers had started harvest, with Grant County starting up the next week.

Although the warmer weather had stepped up the growth as the season progressed, the water shortages were starting to take their toll. Less water meant less corn in some areas, and shorter seasons. Some of the non-irrigated western Washington plantings were also suffering due to the lack of moisture. Although harvest and shipping continued into the fall, by early August supplies had fallen below a reportable volume.

PRODUCTION: According to the WA Agricultural Statistics Service, WA growers produced 392,000 cwt of corn, down about 7% from the 420,000 cwt produced in 1993. It was above the 3-year average of 361,000 cwt.

This production drop mainly due to a decrease in yield, likely due to weather problems. Since 1990, acreage in WA has risen from 2,100 acres to 2,800 acres in 1993 and 1994. Yields have also increased from 110 cwt/acre in 1990 to 150 cwt/acre in 1993, but production fell off to 140 cwt/acre in 1994. The value of the 1994 crop was set at \$10.80/cwt, down about 9% from the \$11.90/cwt in 1993, and the same as 1992.

PACKAGING: Most of the sweet corn for fresh market was packed in 50 pound cartons with approximately 4 dozen ears to the carton.

MARKETING: All prices are for 50 lb cartons of approximately 4 dozen ears, yellow corn. Hydrocooling was not included.

The first fob was issued July 12th at \$7.00, and remained steady for the first week. as supplies increased, prices fell the next week to \$6.00. Prices remained steady through the rest of July only to slide to \$5.00 in August. The last price report was issued on August 5th at \$5.00. This was more than 2 weeks earlier than last season. Light shipments continued through September although supplies were in too few hands to establish a market.

SHIPMENTS: Growers shipped 531,200 cartons during the 1994 season (compared to 1,382,800 in 1993). Shipments peaked the week ending July 16th when 138,200 cartons of corn were shipped. Approximately 74% of the fresh corn marketed in 1994 was shipped in July with the remainder spread out over August, September, and into October.
